

ATMNA Network Card Access System

The new ATMNA Card Access Network System product line revolutionizes the ability to maintain your ATM system while enhancing your abilities to collect information about your customers and usage of the ATM and deliver it to you in real time.

Synergistics Premier Banking is the access control partner of choice for leading financial institutions, like Citibank, Chase, Bank of America, HSBC, Wachovia, SunTrust, IRA, and over 100,000 Synergistics systems are currently used by the banking industry.

System benefits include:

-  **Data Capture -**
 The ATMNA can collect real-time market intelligence and track usage of the ATM occurring at the various markets and hours. The sophisticated ATMNA will aid in the understanding of operational concerns and up-time of the ATM.
-  **Notifications Notices -**
 The ATMNA will send real-time notifications as to the current status of the system, based on the parameters set forth by the customer.
-  **Unmatched System Availability -**
 Service can be allocated to the ATM during normal business hours, and not on priority basis, using the double reader configuration of the ATMNA product.
-  **Reduction In Service Cost -**
 In addition to the unmatched quality of Synergistics' products, allocating the service personnel can be done over time; reducing costs of maintaining the system.

It Just Works

The complete ATMNA system is designed and manufactured by Synergistics Premier Banking to rigorous specifications assuring our bank customers and their patrons years of trouble free service. Our quality control begins where it should, at the design level, and we carry that quality through every step in the manufacturing process.

**PERFECT FOR
 CANSEC AND
 PARABIT RETROFIT**

ATMNA Solves the Security Challenge – Simply and Easily

The ATMNA card access system meets all requirements for ATM vestibule access control. Its unmatched reliability, low cost, and high quality are the reasons for Synergistics Premier Banking's unchallenged, solid leadership.

The ATMNA Access controller will support 2 mag stripe card reader which may be located up to 500 feet from the controller.

Twenty-four hour
vestibule access control

Wide Choice of Readers

Synergistics Premier Banking offers a wide range of reader choices in many shapes and sizes all designed and manufactured to our stringent specifications. So, we are sure to stock the specific reader to meet your special requirements.

Affordable

While the ATMNA system is the most reliable, the highest quality, and the best selling vestibule card access system, it is not expensive. We depend upon our bank customers returning time after time as their needs expand. We offer both our loyal return customers and our new ones the same outstanding value.
